

Colleagues,

A new COVID-19 testing process has been developed for members of the medical staff that meet one of the following criteria:

- 1) Potential exposure to a COVID-19 positive patient and/or symptoms compatible with COVID-19 Infection (Fever, Cough)
- 2) Positive Screening for fever (Temperature > 100 ° F) during routine temperature checking process that will be implemented by all campuses starting April 7/2020 for everybody coming to work. If a member of the medical staff is found to have a fever, the expectation will be to put on an earlobe surgical mask and to return home.

COVID-19 Testing can be requested and arranged by following this link:

(An option to Scan a QR Code to arrange testing will also be available at temperature checking stations):

<http://tinyurl.com/r2t9gbw>

After testing request is completed, instructions and testing location information will be sent. Expected turn-around time will be same day results after sample collection. To ensure that in-house testing capacity is reserved for those that need it the most, this process should only be completed by Members of the Medical Staff that meet the above criteria.

Sincerely,

A handwritten signature in black ink, appearing to read "Neil J. Finkler".

Neil J. Finkler, MD, FACOG, FACS
