## INTRODUCTION

We are pleased to provide the 2025 **Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for AdventHealth** as a useful reference and informational tool. The **Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for AdventHealth** can assist practitioners in selecting clinically appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The **Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for AdventHealth** is reflective of current medical practice as of the date of review.

The information contained in this **Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for AdventHealth** is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This **Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for AdventHealth** is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in the **Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for AdventHealth** is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber. The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

National guidelines can be found on the National Guideline Clearinghouse site at <https://www.ahrq.gov/gam/>.

## PREFACE

The **Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for AdventHealth** is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action.

Individual pharmacy benefit plans may impose restrictions or not reimburse some products. Pharmacy law requires a valid prescription for purchase of needles and syringes in certain states. OTC products are listed for informational purposes. If covered in the pharmacy benefit, OTC products require a valid prescription.

Drugs represented in the **Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for AdventHealth** may have varying cost to the plan member. Prescription benefit plan may alter coverage of certain products

or vary copay amounts based on the condition being treated. Generic medications typically are available at the lowest cost, brand-name medications on the **Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for AdventHealth** will generally cost more than generics, and brand-name medications not on the list will generally cost the most.

## **PHARMACY AND THERAPEUTICS (P&T) COMMITTEE**

The services of an independent National Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve clinically appropriate drug therapies. The P&T Committee is an external advisory body of clinical professionals from across the United States. The P&T Committee's voting members include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Employees with significant clinical expertise are invited to meet with the P&T Committee, but no CVS Caremark® employee may vote on issues before the P&T Committee. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

## **GENERIC SUBSTITUTION**

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product.

One way to reduce out-of-pocket cost is by requesting a generic drug. Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug. Generics may be different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug.

## **LEGEND**

<b>Symbol</b>	<b>Guideline</b>	<b>Description</b>
AGE	Age Restriction	Coverage depends upon member age
PA	Prior Authorization	Requires specific physician request and clinical criteria be met for prescription to be

		covered
QL	Quantity Limit	Prescription quantity limits for specific drugs and/or time period needed for coverage
ST	Step Therapy	Coverage requires a trial of certain clinically appropriate alternative drug(s) before obtaining the prescribed drug
SP	Specialty	Coverage may require dispensing from a specialty pharmacy. Specialty copay/coinsurance applies according to benefit plan
ACA	Affordable Care Act	Drug may be covered as a preventive service for \$0 member cost share.
HDHP PDL	High Deductible Health Plan Preventive Drug List	Drug is included on the High Deductible Health Plan Preventive Drug List, and may bypass the deductible
BOG/DAW9	Brand Over Generic	Note For Internal Pharmacy Use

### **TIERING Benefit Design**

A tier benefit design is where a member is responsible for a portion of the cost of a prescription drug based on the drug's tier and copayment or coinsurance. Specialty drugs may be covered at a higher copay or coinsurance. The following is an example of a formulary tier design:

<b>Tier</b>	<b>Description</b>
Tier 0	\$0 Copay
Tier 1	Generics
Tier 2	Preferred brand medications (formulary agents)
Tier 3	Non-preferred brands medications (non-formulary agents)
