- Patients should only have two visitors at a time and cell phones should be silenced to minimize noise, overexertion and speed recovery.
- For the health of our patients, please check with the nurse before visiting if you have signs or symptoms of illness.
- Do not provide food or beverage to a patient without checking with the nurse, since it may affect their care.
- For the patient's privacy, you may be asked to briefly leave the room when treatments are given.
