

CERNER COMPUTER DOCUMENTATION

Opening a Chart

- Double click on patient name to open chart then establish a relationship in the pop up box (student)

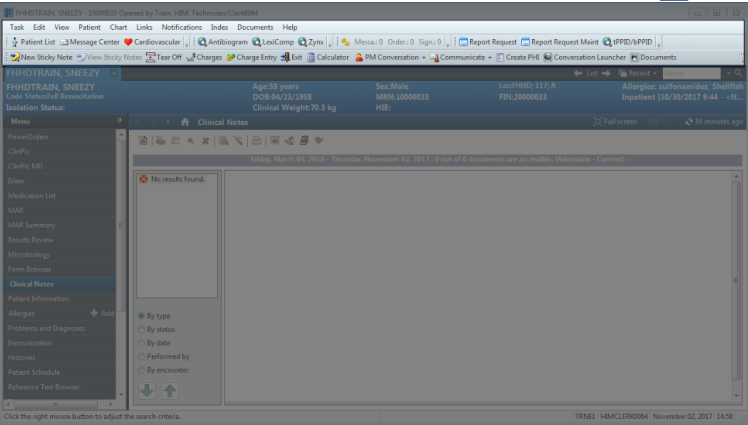

- Once in the patient chart, ensure your name is shown on the top. See example to the right.

Overview of Chart

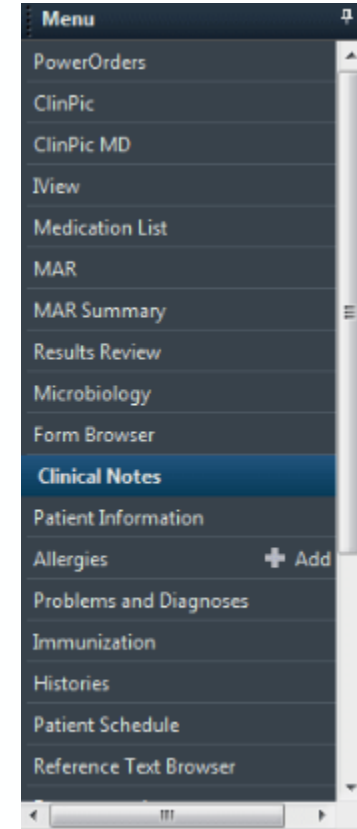

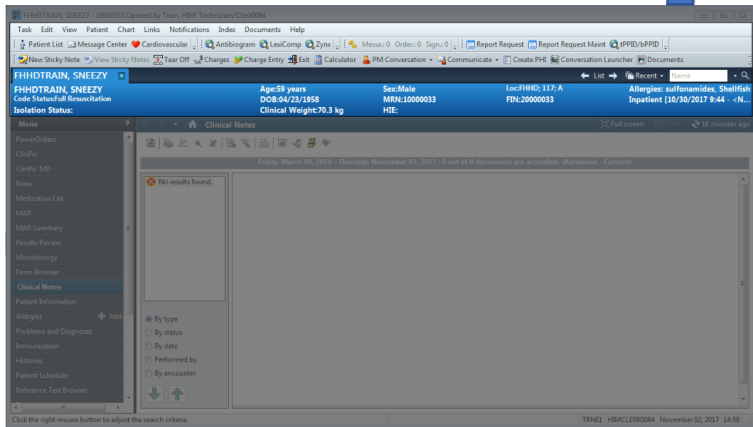

Gray tool bar:

- Medication Administration Wizard (used to scan meds)
- Exit door- proper way to log out of chart
- Calculator-used for conversions (i.e lbs to kg)

Blue banner bar:

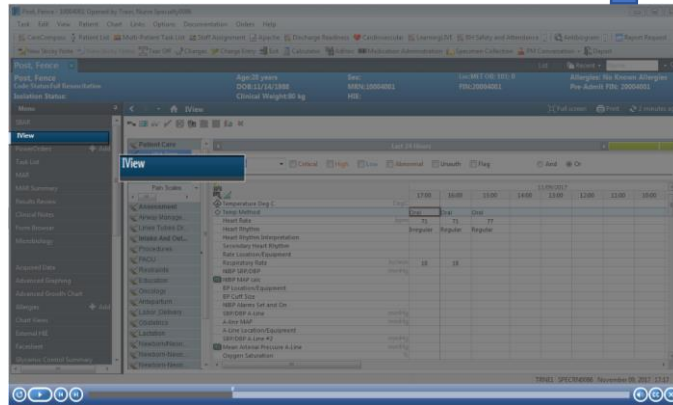

- Overview of patient information
- Example: Code status, weight, allergies

Menu:

- Used to navigate through the chart
- Example: Charting, reviewing results

Overview of Menu

IV:

- This is where all documentation occurs
- Example- head to toe assessment, I&O

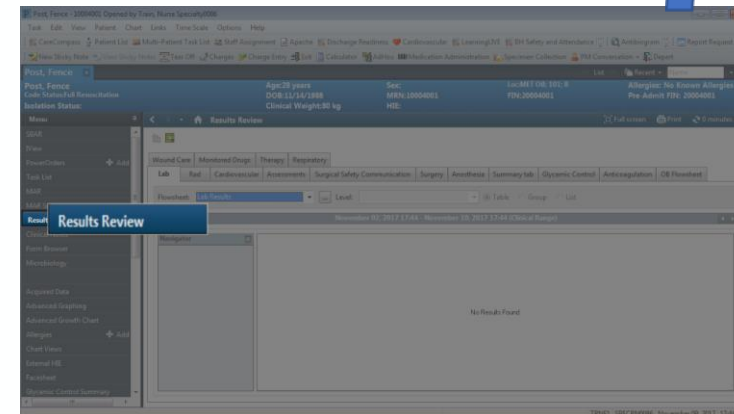

MAR:

- This is where scheduled and ordered medications are found

PowerOrders:

- This is where all orders and plans of care for the patient are found

Results Review:

- This is where you can view results
- Example- labs, xray, etc

Overview of Menu

Clinical Notes:

- This is where you can view notes
- Example- History & Physical, Consult note, etc

SBAR:

- This is used as a handoff communication tool

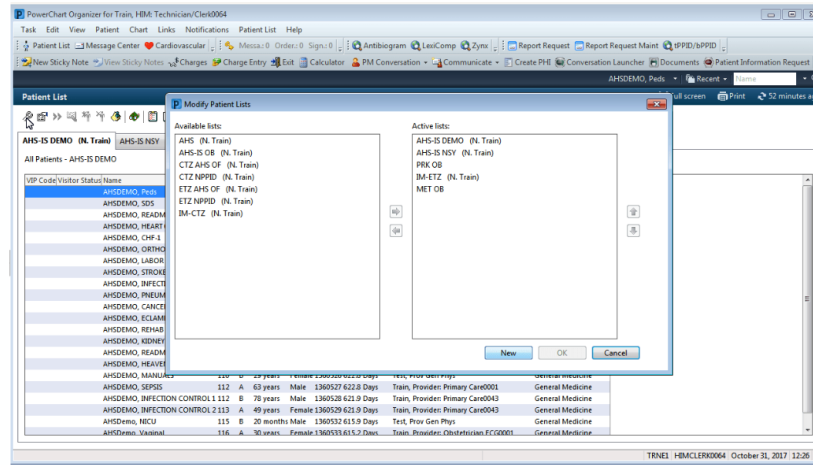

Histories:

- This is where you can view patient and family histories

Creating a Custom List

To create a custom patient list:

- Click on the wrench icon in the left side of the screen
- In the pop-up window, select the “New” button at the bottom

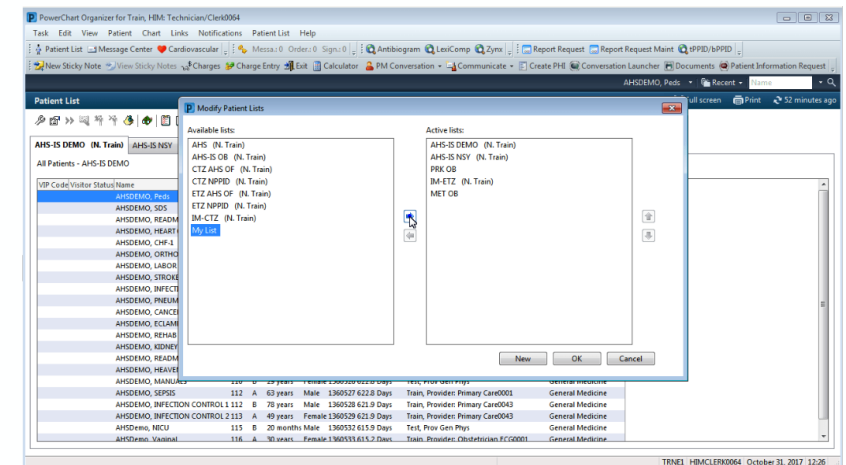

- On the next screen, enter a list name in the free text bar at the bottom
- Select the “Finish” button at the bottom

- On the next screen, select “custom” in the box
- Select the “Next” button at the bottom

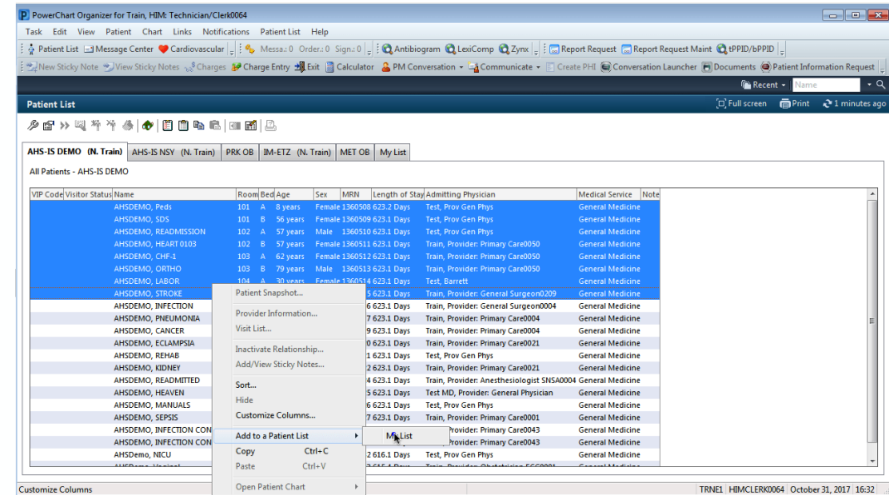

- On the next screen, highlight your list name in the left box
- Click on the highlighted arrow in the middle to move your list to the box on the right
- Select the “ok” button at the bottom

Adding Patients to a Custom List

- Highlight the patients you would like to add to your list
Tip: hold control key down to select patients that are not in a row
- Once you have selected your patients, right click on a highlighted patient
- Select “Add to a Patient List” and click you list name to the right

- Click on your list tab
- Your selected patients should now appear on your list
- If your patients did not appear, click the refresh button in the upper right of your screen

IView

IView is where majority of the clinical documentation is completed

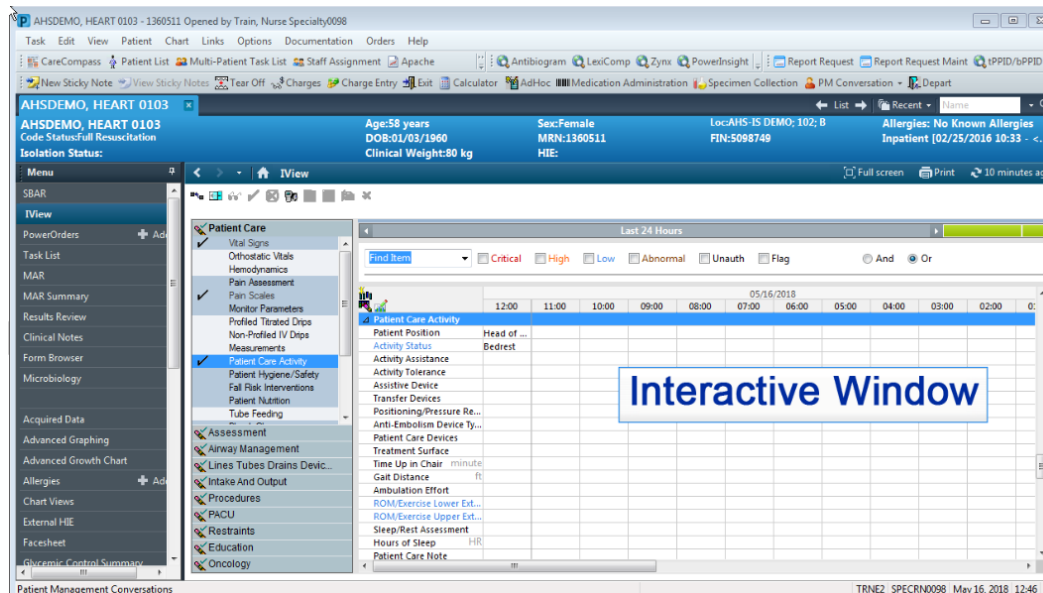

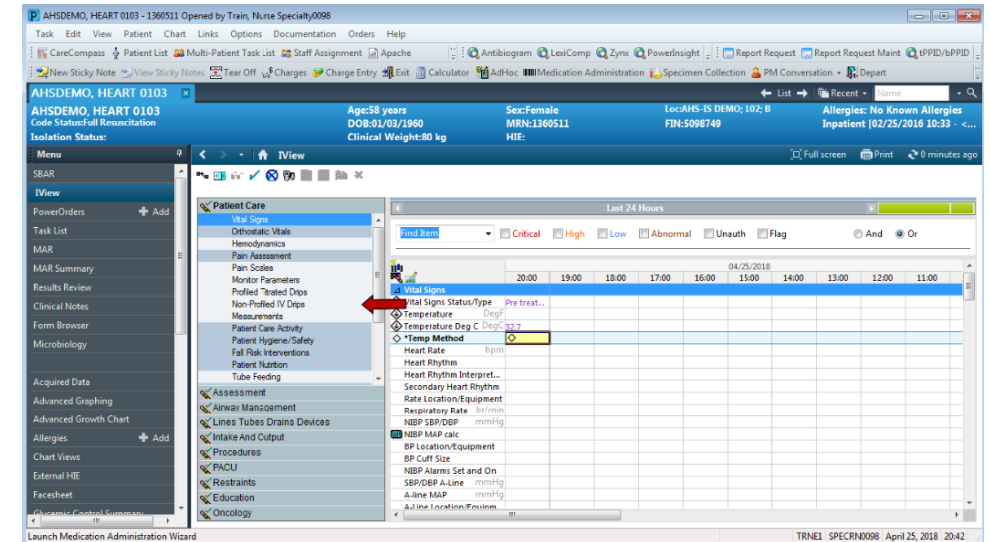

- IView contains *bands* which have *sections* in them

Bands

Sections

- Selecting a band or a section will open up the documentation field to the right
- The “interactive window” is where the documentation occurs
- You can open up a documentation field by double clicking on the field that you choose

IView

The screenshot shows the IView software interface for patient AHSDemo, HEART 0103. The patient's age is 58 years, DOB is 01/03/1960, sex is Female, and MRN is 1360511. The chart displays vital signs data for the last 24 hours. A text box labeled "Text in purple" is overlaid on the chart area, indicating that the text entered in the chart is not yet saved.

- After documentation is complete, the text will be purple. This means the documentation is NOT saved
- Click the green check mark in the right upper part of the screen to save your documentation

- After the documentation is saved, a small check mark will appear
- The nursing instructor or precepting nurse will need to authenticate the documentation
- Once verified, the check mark will disappear
