## Protein Supplement Guidelines Following Bariatric Surgery

- Choose good-quality complete proteins such as whey protein isolate, whey protein concentrates or blends, soy protein isolate and egg-white powder. Many of these brands offer an unflavored powder.
- Plant-based protein supplements should contain soy isolate or a blend of several protein sources such as pea, hemp or brown rice.
- Goals for protein are 20-30 grams per serving (up to 40 grams if needed to meet protein goals)
- Goals for carbohydrates are about 5 grams, with 0 grams of added sugar. Some protein drinks add fiber, which will increase the carbohydrate grams.
