Acknowledgements

This community health plan was prepared by Sondra Wallace, with contributions from members of AdventHealth Lenexa City Center Community Health Needs Assessment Committee and Hospital Health Needs Assessment Committee both representing health leaders in the community and AdventHealth Lenexa City Center leaders.

We are especially grateful for the internal and external partners who helped guide the development of the community health plan which will enable our teams to continue fulfilling our mission of Extending the Healing Ministry of Christ.

Executive Summary

Executive Summary

Shawnee Mission Medical Center d/b/a AdventHealth Lenexa City Center will be referred to in this document as AdventHealth Lenexa City Center or the “Hospital”.

Community Health Needs Assessment Process

AdventHealth Lenexa City Center in Lenexa, Kansas, utilized the data from the community health assessment conducted by AdventHealth Shawnee Mission in 2025. The assessment identified the health-related needs of the community, including low-income, minority and other underserved populations. The priorities were defined in alignment with Healthy People 2030; the national initiative aimed at improving the health and well-being of people in the United States.

In order to ensure broad community input, AdventHealth Lenexa City Center created a Community Health Needs Assessment Committee (CHNAC) to help guide the Hospital through the assessment process. The CHNAC included representation from the Hospital, public health experts and the broad community. This included intentional representation from low-income, minority and other underserved populations.

AdventHealth Lenexa City Center also convened a Hospital Health Needs Assessment Committee (HHNAC) to help select the needs the Hospital would most effectively address to support the community. The HHNAC made this decision by reviewing the priority needs selected by the CHNAC and the internal Hospital resources available.

The CHNAC reviewed the primary and secondary data, helped define the priorities to be addressed and helped develop the Community Health Plan (CHP) to address those priorities. Learn more about Healthy People 2030 at health.gov/healthypeople.

Community Health Plan Process

The Community Health Plan (CHP), or implementation strategy, is the Hospital’s action plan to address the priorities identified from the CHNA. The plan was developed by the CHNAC and HHNAC, and input was received from stakeholders across sectors, including public health, faith-based, business and those individuals directly impacted.

The CHP outlines targeted interventions and measurable outcomes for each priority noted below. It includes resources the Hospital will commit and notes any planned collaborations between the Hospital and other community organizations and hospitals.

The defined goals and activities were carefully crafted, considering evidence-based resources and sought to align with AdventHealth’s organizational and strategic plans. AdventHealth Lenexa City Center is committed to addressing the needs of the community, especially the most vulnerable populations, to bring wholeness to our communities.

Executive Summary

Priorities Addressed

The priorities addressed include:

1. Heart Disease and Stroke
2. Mental Health
3. Health Care Access and Quality

See page 10 for the defined strategies and next steps for each priority selected to be addressed.

Priorities Not Addressed

The priorities not addressed include:

1. Asthma
2. Cancer
3. Diabetes
4. Obesity
5. Drug and Alcohol Use
6. Physical Activity
7. Tobacco Use
8. Economic Stability
9. Education Access and Quality
10. Neighborhood and Built Environment-Food Security

See page 18 for an explanation of why the Hospital is not addressing these issues.

The Community Health Plan is a three-year strategic plan and may be updated during implementation based on changing community needs and priorities. AdventHealth recognizes community health is not static and high-priority needs can arise or existing needs can become less pressing. The Hospital may pivot and refocus efforts and resources to best serve the community.

Executive Summary

Board Approval

On February 24, 2026, the AdventHealth Lenexa City Center Board approved the Community Health Plan goals, activities and next steps. A link to the 2026-2028 Community Health Plan was posted on the Hospital's website on May 15, 2026.

Ongoing Evaluation

AdventHealth Lenexa City Center's fiscal year is January 1 – December 31. For 2026, the Community Health Plan will be deployed beginning February 24, 2026, and evaluated at the end of the calendar year. In 2027 and beyond, the CHP will be evaluated annually for the 12-month period beginning January 1 and ending December 31. Evaluation results will be attached to the Hospital's IRS Form 990, Schedule H. The collective monitoring and reporting will ensure the plan remains relevant and effective.

About AdventHealth

About AdventHealth

AdventHealth Lenexa City Center is part of AdventHealth. With a sacred mission of Extending the Healing Ministry of Christ, AdventHealth strives to heal and restore the body, mind and spirit through our connected system of care. More than 100,000 talented and compassionate team members serve over 8 million patients annually. From physician practices, hospitals and outpatient clinics to skilled nursing facilities, home health agencies and hospice centers, AdventHealth provides individualized, whole-person care at more than 50 hospital campuses and hundreds of care sites throughout nine states. Committed to your care today and tomorrow, AdventHealth is investing in new technologies, research and the brightest minds to redefine wellness, advance medicine and create healthier communities.

In a 2020 study by Stanford University, physicians and researchers from AdventHealth were featured in the ranking of the world's top 2% of scientists. These critical thinkers are shaping the future of health care. Amwell, a national telehealth leader, named AdventHealth the winner of its Innovation Integration Award. This telemedicine accreditation recognizes organizations that have identified connection points within digital health care to improve clinical outcomes and user experiences. AdventHealth was recognized for its innovative digital front door strategy, which is making it possible for patients to seamlessly navigate their health care journey. From checking health documentation and paying bills to conducting a virtual urgent care visit with a provider, we're making health care easier — creating pathways to wholistic care no matter where your health journey starts.

AdventHealth is also an award-winning workplace aiming to promote personal, professional and spiritual growth with its team culture. Recognized by Becker's Hospital Review on its "150 Top Places to Work in Healthcare" several years in a row, this recognition is given annually to health care organizations that promote workplace diversity, employee engagement and professional growth. In 2024, the organization was named by Newsweek as one of the Greatest Workplaces for Diversity and a Most Trustworthy Company in America.

About AdventHealth Lenexa City Center

Opening in July 2025, AdventHealth Lenexa City Center will be the first full-service inpatient hospital in Lenexa, Kansas. Located on a 25-acre campus in the Lenexa City Center district, this \$247 million facility will span 244,000 square feet and initially house 54 inpatient beds (expandable to 96), with four operating rooms, a 24/7 emergency department, and comprehensive medical services.

The campus will also include a 56,000-square-foot medical office building offering outpatient and specialty care. Services will focus on whole-person health and include emergency care, orthopedics, cardiology, digestive health, robotic-assisted surgery, and more.

Led by CEO Sissel Jacob, CFO Rodney Allen II, CMO Dr. Mark Brady, and CNO Teresa Noland, the hospital continues AdventHealth's mission of "Extending the Healing Ministry of Christ" by delivering compassionate, faith-based care to western Johnson County.

Priorities Addressed

Heart Disease and Stroke

According to secondary data, 5.7% of residents in the Hospitals' community have coronary heart disease which is the same as the state average. Wyandotte County had the highest rate with 6.9% of adults having the disease. According to the community survey, 15% of respondents have been diagnosed with coronary heart disease. In the Hospital's community, 36.7% of residents have high cholesterol, while 31.7% of residents have high blood pressure. According to the community survey, 46% of respondents reported having high blood pressure. The cardiovascular disease needs in the community are significant. Including cardiovascular disease as a priority, the Hospital can align to local, state and national efforts for resources and to create better outcome opportunities over the next three years.

Goal

Improve cardiovascular health to reduce heart disease and stroke through expanded access to prevention resources and education.

Activity

Identify and establish community partnerships that provide improved cardiovascular health for residents in the hospital's Primary Service Area.

Output

- Number of community organizations
- Amount of funding

Outcome

By December 31, 2028, establish continuous support for at least two additional community organizations providing cardiovascular health programs and/or resources.

Hospital Contributions

- Whole Health Institute
- Cash Donations

Community Partnership

- Johnson County Dept. of Health & Environment

Heart Disease and Stroke

Activity

Connect adults with hypertension to cardiovascular health programming and education in the community.

Output

- Number of connections to community education and/or programming
- Number of referrals to food and wellness resources through partner organizations.

Outcome

By December 31, 2028, achieve a 20% increase in the number of adults with hypertension accessing cardiovascular health programming and/or education.

Hospital Contributions

- Whole Health Institute
- Whole Health Hub

Community Partnership

- Johnson County Dept. of Health & Environment
- Health Partnership Clinic

Mental Health

In the Hospitals' community, 18.3% of residents have a prevalence of depression, which is below the state average of 20%. The depression rate was highest in Linn County at 21%. Secondary data also showed 14.8% of the residents report poor mental health. According to the community survey, 26% of respondents have been diagnosed with a depressive order and 28% have been diagnosed with an anxiety disorder. Stakeholders chose mental health as a top health condition affecting the community. Awareness and the need to address mental health disorders has been growing in the country. Including mental health as a priority, the Hospital can align to local, state and national efforts for resources and to create better outcome opportunities over the next three years.

Goal

Improve access to mental health programs and resources for residents in hospital's Primary Service Area.

Activity

Provide support for mental health programs in the community.

Output

- Number of organizations supported
- Amount of funding

Outcome

By December 31, 2028, establish continuous support for at least two additional community organizations providing mental health programs and/or resources.

Hospital Contributions

- Care Management & Social Workers
- Spiritual Integration Specialists
- Cash Donations

Community Partnership

- Johnson County Mental Health: Suicide Prevention Coalition & Prevention & Recovery Coalition
- Johnson County School Districts

Mental Health

Activity

Provide holistic support and recovery resources for individuals with anxiety and/or depression.

Output

- Number of people served
- Number of holistic workshops or education provided
- Number of referrals to recovery resources & support groups
- Amount of funding

Outcome

By December 31, 2028, at least 70% of participants will report reduced symptoms of anxiety and depression.

Hospital Contributions

- Care Management & Social Workers
- Spiritual Integration Specialists
- Behavioral Health Center
- Whole Health Institute
- Cash Donations

Community Partnership

- Johnson County Mental Health: Suicide Prevention Coalition & Prevention & Recovery Coalition

Mental Health

Activity

Engage with FACT (Forensic Assessment Consultation and Treatment) Team representatives to expand access to relationship violence and personal safety resources.

Output

- Resource guide developed and disseminated
- Number of engaged Team Members (forensic nurses, social workers, community health workers)
- Number of team member volunteer hours

Outcome

By December 31, 2028, access to resources for individuals who have experienced relationship violence will increase by 10% through referral pathways and community partners.

Hospital Contributions

- Care Management & Social Workers
- FACT Team
- Behavioral Health Team

Community Partnership

- Johnson County Health & Environment Department
- Sunflower House
- MOCSA (Metropolitan Organization Countering Sexual Assault)
- SafeHome

Health Care Access and Quality

In the Hospitals' community, 9.8% of residents do not have health insurance. According to the community survey, 29% of respondents said they needed to see a doctor in the past 12 months but couldn't due to cost. When asked what type of care cost has prevented, 709 respondents said medical care and 616 respondents said dental care. Stakeholders also pointed to a lack of Medicaid expansion in the state as a barrier for residents to receive medical and mental health services. Awareness and the need to address health care access and quality has been growing in the country. Including health care access and quality as a priority, the Hospital can align to local, state and national efforts for resources and to create better outcome opportunities over the next three years

Goal

Increase access to comprehensive, high-quality health care services through improved communication, preventive care and reduced barriers, including language and food security.

Activity

Identify and establish community partnerships that provide access to health care services for uninsured or underinsured individuals in the hospital's Primary Service Area.

Output

- Number of community organizations
- Amount of funding

Outcome

By December 31, 2028, establish continuous support for at least two additional community organizations providing health care services for uninsured or underinsured individuals.

Hospital Contributions

- Care Management & Social Workers
- Cash Donations

Community Partnership

- Health Partnership Clinic

Health Care Access and Quality

Activity

Distribute health communication materials in both English and Spanish to ensure patients and families have access to critical health information.

Output

- Number of materials distributed
- Amount of funding (both cash & in-kind)

Outcome

By December 31, 2028, access to health communication resources will increase for residents in the hospital's PSA, with measurable growth in material distribution.

Hospital Contributions

- Care Management & Social Workers
- Clinical Managers
- Cash Donations

Community Partnership

- JoCo Dept. of Health & Environment
- Health Partnership Clinic
- Mid-America Regional Council

Priorities Not Addressed

Priorities Not Addressed

AdventHealth Lenexa City Center also identified the following health needs during the CHNA process. In reviewing the CHNA data, available resources and ability to impact, the Hospital determined these needs will not be addressed.

Asthma

Asthma is shown to impact 10% of residents in the Hospitals' community according to public data, while 15% of community survey respondents report having asthma. The Hospital did not select asthma as a priority, as it is not positioned to directly address this in the community at large and will focus its available resources where there is the greatest opportunity for positive impact.

Cancer

In the Hospitals' community, 7.9% of residents have a prevalence of cancer, which is higher than the state (7.1%) and national average (6.9%). According to the community survey, 18% of respondents reported having been diagnosed with cancer. Of those respondents who said they had cancer, the most common types were skin, breast and prostate cancer.

While the Hospital did not select cancer as a priority, the need for cancer prevention and treatment is significant. The Hospital currently provides several cancer treatment options for patients and continues to prepare itself to meet additional needs in the future. In the meantime, the Hospital will support partners who address unmet needs.

Diabetes

Diabetes is shown to impact 10.6% of residents in the Hospitals' community according to public data, while 25% of community survey respondents report having diabetes. Wyandotte county had the highest rates of adults diagnosed with diabetes, at 15.1% which is much higher than the state average of 10.4%.

Diabetes-related conditions are also shown to be one of the top ten codes in Hospital visits by uninsured patients.

While the Hospital did not select diabetes as a priority, the need for diabetes prevention and treatment in the community is significant. Due to the significant difference between the primary (25%) and secondary (10.6%) data sources, the Hospital recommended addressing this need through the health care access and quality and heart disease and stroke priorities.

Obesity

In the Hospital's community, 34.5% of residents are overweight or obese, which is higher than the national average of 33.8%. According to secondary data, 41.5% of adults in Wyandotte County are obese, which is the highest rate among the counties the Hospitals serve.

The obesity need in the community is significant, however, the Hospital did not perceive the ability to have a measurable impact on the issue within the three years allotted for the Community Health Plan with the current resources available to the community and the Hospital at this time.

Drug and Alcohol Use

Drug and alcohol use was a top health behavior as chosen by the stakeholders. In the Hospitals' community, 17.4% of residents binge drinking, with every county surpassing the state (18.3%) and national (18.6%) average. Binge drinking is when an individual reports having five or more drinks (men) or four or more drinks (women) on an occasion in the past 30 days.

Priorities Not Addressed

According to the community survey, 27% of respondents reported taking prescription medication for non-medical reasons. Meanwhile, 22% of community survey respondents report taking prescription pain medication without a doctor's prescription.

The need to address drug and alcohol use has been a growing trend across the country, however, the Hospital did not perceive the ability to have a measurable impact on the issue within the three years allotted for the Community Health Plan with the current resources available to the community and the Hospital at this time.

Physical Activity

In the Hospitals' community, 22% of residents report not engaging in any physical activity in the past 30 days, with Linn County (25.3%) surpassing both the state (23.7%) and national averages (23.7%). Among community survey respondents, 13% reported not exercising in the past 30 days while 26% reported exercising 1-2 times per week.

Community members in the assessment cited a need for more low-cost fitness centers and accessible community spaces for recreation. The Hospital did not prioritize physical activity as it believes that other organizations are better positioned in the community to address this need directly and will support those efforts when able.

Tobacco Use

In the Hospitals' community, 12.6% of residents smoke cigarettes, with Wyandotte County (19.4%) surpassing both the state (15.6%) and national (14.6%) averages. The rate in Linn county (17.4%) was the second highest. According to the community survey, 25% of respondents smoke cigarettes, and 25% vape or use e-cigarettes.

The Hospital did not prioritize tobacco use as it already addresses tobacco use through smoking cessation programming. Several community partners also address this issue in the community. Therefore, the Hospital will prioritize other health needs impacting the community.

Economic Stability

Stakeholders ranked living wage, poverty and affordable housing as top community conditions impacting the health of the community. In the Hospital's community, 24.5% of residents are housing cost-burdened, while 10.2% of residents are severely housing cost-burdened. According to the community survey, 24% of respondents reported being worried they would not have stable housing in the next two months.

Economic stability has been a growing concern across the country; however, the Hospital did not perceive the ability to have a measurable impact on the issue within the three years allotted for the Community Health Plan with the current resources available to the community and the Hospital at this time.

Education Access and Quality

According to secondary data, 93.2% of adult residents in the Hospitals' community have graduated high school, 47.7% have a college degree, while 49.1% of residents aged three-four are enrolled in preschool. Wyandotte County had the lowest high school graduation rate at 81.4% of adult residents, which is below the state average of 92.1%. The Hospital did not select education access and quality as a priority due to a lack of resources and will support external partners to address these issues whenever possible.

Priorities Not Addressed

Neighborhood and Built Environment-Food Security

Approximately 4.2% of the households in the Hospitals' community reported receiving SNAP benefits in the past 12 months, which is below the state average of 7%. In Wyandotte county, 12.9% of households receive SNAP benefits. According to the community survey, 21.6% of respondents received SNAP benefits. Additionally, 24.5% of survey respondents are food insecure meaning they reported eating less than they should in the past 12 months due to cost. The Hospital did not prioritize this need and believes that other organizations are better positioned in the community to address this need directly and will support those efforts when able.
